About Me

Aspiring UX Designer and Design Strategist with a strong background in end-to-end product development, driven by a passion for creating user centered solutions. Seeking opportunities to apply innovative thinking and collaborate with a visionary multi-disciplinary team to tackle challenging problems.

Experience

UX UI Design

Designed wireframes and interactive prototypes for a Pet Care applications
Collaborated with a team of developers to implement the final design
Conducted user testing to gather feedback and iteratively improve the user experience
Created high-fidelity mockups using Adobe Xd and implemented responsive design principles

Visual Design

Deep understanding of color theory and the ability to choose harmonious color palettes
Experience in developing brand identities, including logos, brand guidelines, and visual assets
Highly experienced in a corporate and regulated industry environment
Strong understanding of typography principles and the ability to select appropriate fonts for different contexts

Front end Developer

Proficient in front-end development technologies, including HTML5, CSS3, JavaScript, and jQuery
Expertise in converting Figma designs into pixel-perfect and responsive HTML/CSS templates
Continuously staying updated with the latest front-end development trends, tools, and best practices
Ability to translate complex design concepts into fully functional and interactive web pages
